La rentabilidad de cada fondo, para cada uno de los períodos indicados en este informe, se presenta neta después de comisión de administración y gastos, y antes de retención en la fuente.

El desempeño y saldo de su inversión depende de la fecha de realización de la misma, de los movimientos de su cuenta de inversión y del comportamiento de los activos que integran el portafolio de cada fondo, lo que no garantiza que el comportamiento histórico de los fondos sea similar o igual en el futuro.

La inversión en fondos de inversión colectiva está sujeta a los riesgos de inversión, derivados de la evolución de los precios de los activos que componen el portafolio del respectivo fondo, además de todos los riesgos estipulados en el reglamento de cada uno de ellos.
